Privately published under the auspices of the

EXECUTIVE COMMITTEE OF THE

FRIENDS OF THE ARMY MEDICAL LIBRARY

Washington, D. C.

Friends of the Army Medical Library

Two years ago the American Library Association published an informal booklet containing under one cover, the plans, forms and other materials which had been used by groups of people who are interested in befriending libraries. The work of assembling the information had begun as far back as 1935, and at the time of publication more than 100 groups of friends had organized in 34 of the States of the Union. Acting upon the information contained in the booklet, the "Friends of the Army Medical Library" came into being as an organization.

Many of our members may be glad to know that our group not only becomes the first to represent a medical library, but it is also the first one ever to be connected with a Federal institution, a new departure indeed. One might ask, why should a Government supported institution have friends? The answer might be that a library has no alumni, and even if its staff is the most loyal in the world it is neither large enough nor permanent enough to make possible, in the traditional sense of the term, what we may call esprit de corps. There should be a body of devoted individuals who see in it the spirit of service and worth while accomplishment. From such a disinterested group the library will profit by the friendly advice and criticism it receives.

The purposes of university and college groups are generally the same: to constitute a company of alert persons to discover idle books in private libraries; duplicate copies which have been read by the owner and can be spared; large numbers of books in special fields perhaps by one member of a family in which other members are not interested, and so on. The Army Medical Library Friends are not urged to make this their prime purpose, but the Library will be appreciative of any action taken in this direction, because its appropriated funds are necessarily limited and can seldom be applied to the purchase of collections of rare items.

Thus far no social activities have been suggested such as are found in many of the other associations formed, but the Executive Committee at some time in the future, perhaps when the new Library becomes a reality, ventures to hope that some sort of "get together" may be arranged. The dedication of the new building would be an excellent opportunity for us to get acquainted personally and to make ourselves individually articulate.

As mentioned in the Current List, an invitation to enroll as a Friend of the Army Medical Library was sent to about 2800 persons believed to have an interest in the wider use of the resources of this Library. There must be many others who would be willing to lend their support to this undertaking if they knew about it, and your cooperation is earnestly requested in sending in the names of persons whom you think may be interested in joining this organization.

CURRENT LIST OF MEDICAL LITERATURE is published weekly and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is \$5.00 per year in the United States and \$6.50 per year in other countries. The RECENT BOOK ACQUISITIONS may be obtained separately at \$1.00 per year. Address communications to: Medicofilm Service
Army Medical Library, Washington, D.C.

1. Anatomy, Embryology, Morphology

Am. J. Anat., 1941, 68:

- JONES, R.L. The human foot; an experimental study of its mechanics, and the role of its muscles and ligaments in the support of the arch. 1-39.
- BRUCE, J.A. Time and order of appearance of ossification centers and their development in the skull of the rabbit. 41-67.
- SILBERBERG, M., & SILBERBERG, R. Age changes of bones and joints in various strains of mice. 68-95.
- WISLOCKI, G.B., & ENDERS, R.K. The placentation of the bottle-nosed porpoise, *Tursiops truncatus*. 97-125.
- CEMINS, H., WAITS, W.J., & MCQUITTY, J.T. The breadths of epidermal ridges on the finger tips and palms; a study of variation. 127-50.

Arch. ital. anat., 1940, 43:

- FAZZARI, I. Tipo ed evoluzione dell'architettura dell'astragalo e del calcagno umano. 211-23.
- GOZZI, R. Differenziazione e proprietà biologiche del tessuto muscolare liscio embrionale coltivato in vitro. 239-54.
- LEGHISSE, S. La terminazione extramidollare della fibra del Mauthner in avannotti di trota. 255-80.
- BUCCIANTIE, L. Sulla struttura della membrana sinoviale del ginocchio dell'uomo nelle varie età. 281-307.
- PASSANTINO, G. Sulla struttura delle linfoghiandole mesenteriche dell'Ovis aries e della Capra hircus con speciale riguardo ai centri germinativi in rapporto all'età; ricerche anatomiche. 308-321.

Boll. Soc. eustach., 1940, 38:

- FRULLA, M. Su due composti azoici isomeri arseniacali tipo para-ammino-fenilsolfamide. 3-8.
- MAZZARON, A. Sull'influenza di concimi diversi sulla produzione e composizione dell'essenza di menta. 9-16.
- FORESTI, B. Influenza del pH sulla velocità dell'idrogenazione catalitica di alcune olefine. 17-27.
- FORESTI, B. Influenza del pH velocità dell'idrogenazione catalitica del benzolo ed alcuni suoi omologhi. 29-38.
- ZAMPETTI, R. Osservazioni su n. 22 varietà di ricino coltivate nell'Orto botanico di Camerino. 39-46, 2 pl.

Okajimas fol. anat., 1940, 19:
